DANIEL PELEG

Waterloo, ON dpeleg2000@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software developer and IT professional with 10+ years of experience in systems administration and network infrastructure, now transitioning into full-stack development. Combines science background with proven expertise in problem-solving, automation, and scalable system implementation.

PROFESSIONAL EXPERIENCE

Co-op Software Developer | *May 2025 - present*

P&P Optica | Waterloo, Ontario, Canada

- Developed and deployed full-stack applications using Python, TypeScript, React, and Node.js
- Implemented cloud solutions using AWS services (S3, Cognito, Lambda, CloudFormation)
- Designed and created AI implementation increasing functionality and user experience
- Managed product development, feature roadmaps, and timeline delivery for core software platforms
- Spearheaded cross-team knowledge sharing between different business units inside the organization

Systems and Network Junior Administrator | *Jul 2017 - Jul 2023*

Walworth Barbour American International School | Even Yehuda, Israel

- Managed campus network infrastructure including 20+ switches and 80+ AP's
- Orchestrated 20+ Windows/Linux servers deployment using Hyper-V, reducing recovery time by 40%
- Developed Python automation scripts using Selenium for testing and web process automation

Information Technology Help Desk Support | *Jul 2012 - Jun 2017*

Walworth Barbour American International School | Even Yehuda, Israel

- Implemented comprehensive Device Management, Endpoint Protection, and Web Filtering solutions
- Provided technical support for 600+ users across hardware, software, and network connectivity issues

Quality Control Analyst | *Apr 2008 - Jun 2012*

Vitamed Pharmaceuticals | Binyamina, Israel

- Performed analytical testing using HPLC, GC, UV-Vis spectroscopy with 99.8% accuracy rating
- Validated 10+ analytical procedures, reducing analysis time by 30% through process optimization

PROJECTS

Dynamic Configuration Management System

- Technologies: AWS Lambda, PostgreSQL, React, Python, Bash
- Challenge: Configuration data was hardcoded in deployment scripts, requiring full application redeployment for simple data changes at client sites
- Solution: Migrated hardcoded values to database storage with AWS Lambda handlers, built React frontend interface and external shell script for configuration management
- Impact: Eliminated need for application redeployment for configuration changes, enabling product team to make real-time updates without client site visits or support from development teams.

Enterprise Network Segmentation and Authentication System

- *Technologies: Cisco Switches, Meraki Access Points, MDM (Jamf), Certificate Management*
- *Challenge: Flat network design with static DHCP lists created security vulnerabilities and high administrative overhead for managing 600+ users across staff, students, and BYOD devices*
- *Solution: Implemented segmented network architecture with role-based access control, migrated from static DHCP to certificate-based authentication via MDM deployment*
- *Impact: Enhanced security through user/device group separation, reduced network management tasks by 70%, and streamlined onboarding process for new users and devices*

EDUCATION

Advanced Diploma, IT Innovation and Design | Sep 2023 – present

Conestoga College | Waterloo, Ontario

- Focused on full-stack web development, cloud computing, and agile software development methodologies
- Completed hands-on projects using C#, .NET, Node.js, and database management systems
- Gained expertise in DevOps practices, CI/CD pipelines, and modern software architecture patterns **B.Sc. Chemistry and Physics** | Oct 2003 – Jun 2007

The Hebrew University of Jerusalem | Jerusalem, Israel

- Developed strong analytical and problem-solving skills through advanced mathematics and scientific research
- Extensive laboratory work in cutting-edge technologies including spectroscopy, chromatography, and computational modeling
- Completed additional courses and lectures by industry leaders in science-related companies

---

CERTIFICATIONS

- Jamf CCA (2018)
- Jamf CCT (2017)

TECHNICAL SKILLS

- Development: Python, JavaScript/TypeScript, React, Node.js, Next.js, HTML/CSS, C#, Bash
- Cloud & Infrastructure: AWS (S3, Cognito, Lambda, CloudFormation), PostgreSQL, Hyper-V
- Network & Security: Cisco/Meraki, FortiGate, Network Monitoring, Endpoint Security, Content Filtering
- Systems: Windows Server, Linux, macOS, Google Workspace, MDM Solutions
